After the client pay successfully they could receive the mails about AI-900 guide questions our system sends by which you can download our test bank and use our study AI-900 STUDY materials in 5-10 minutes.

That is to say, consumers can prepare for AI-900 exam with less time but more efficient method, What AI-900 practice questionstorrent wants is very simple but helps you get [Exam NS0-184 Actual Tests](#) the certification to you as soon as possible through its startling quality and ability.

We can be proud to say that our AI-900 exam preparation: Microsoft Azure AI Fundamentals have won wide reception and preference among people from all countries.

NEW QUESTION: 1

A DevOps Engineer is reviewing a system that uses Amazon EC2 instances in an Auto Scaling group. This system uses a configuration management tool that runs locally on each EC2 instance. Because of the volatility of the application load, new instances must be fully functional within 3 minutes of entering a running state. Current setup tasks include:

- Installing the configuration management agent - 2 minutes
- Installing the application framework - 15 minutes
- Copying configuration data from Amazon S3 - 2 minutes
- Running the configuration management agent to configure instances - 1 minute
- Deploying the application code from Amazon S3 - 2 minutes

How should the Engineer set up system so it meets the launch time requirement?

A. Build a custom AMI that includes the configuration

management agent, application framework, and configuration data. Write a bootstrap script to run the agent to configure the instance and deploy the application from Amazon S3.

B. Trigger an AWS Lambda function from an Amazon CloudWatch Events rule when a new EC2 instance launches. Have the function install the configuration management agent and the application framework, pull configuration data from Amazon S3, run the agent to configure the instance, and deploy the application from S3.

C. Write a bootstrap script to install the configuration management agent, install and the application framework, pull configuration data from Amazon S3, run the agent to configure the instance, and deploy the application from S3.

D. Build a custom AMI that includes the configuration management agent and application framework.

Write a bootstrap script to pull configuration data from Amazon S3, run the agent to configure the instance, and deploy the application from S3.

Answer: A
