Explanation:

Subsectors or carve-outs of larger international composites may be used to create stand-alone composites only if the subsectors are actually managed as separate entities with their own cash allocations and currency management. Portfolios must not be switched from one composite to another unless documented changes in client guidelines make switching appropriate. This is a requirement for creation and maintenance of composites.

All servers run Windows Server 2016. All client computers run Windows 10 and are domain members. All laptops are protected by using BitLocker Drive Encryption (BitLocker). You have an organizational unit (OU) named OU1 that contains the computer accounts of application servers. An OU named OU2 contains the computer accounts of the computers in the marketing department. A Group Policy object (GPO) named GP1 is linked to OU1. A GPO named GP2 is linked to OU2. All computers receive updates from Server1. You create an update rule named Updatel. End of repeated scenario. You need to create an Encrypting File System (EFS) data recovery certificate and then add the certificate as an EFS data recovery agent on Server5. What should you use on Server5? To answer, select the appropriate options in the answer area.
