D. æœ€çµ, çµ,,ç«<ã, 'ã¼'ã•†è" ^ç" »i¼^æ^|ç•¥40i¼%

Answer: A

NEW QUESTION: 2

Amazon CloudWatch supports custom metrics. A user wants to capture data from a service and upload it to CloudWatch. The user wants to minimize the number of API calls to CloudWatch. Which of the following is the best way to capture the data and upload it to CloudWatch?

A. The user can use the CloudWatch CLI to capture the data and upload it to CloudWatch as single data points.

B. The user can use the CloudWatch CLI to capture the data and upload it to CloudWatch as a single data point.

C. The user can use the CloudWatch CLI to capture the data and upload it to CloudWatch as a single data point.

D. The user can use the CloudWatch CLI to capture the data and upload it to CloudWatch as a single data point.

Amazon CloudWatch supports custom metrics. A user wants to capture data from a service and upload it to CloudWatch. The user wants to minimize the number of API calls to CloudWatch. Which of the following is the best way to capture the data and upload it to CloudWatch?

Answer: C

Explanation:

AWS CloudWatch supports the custom metrics. The user can always capture the custom data and upload the data to CloudWatch using CLI or APIs. The user can publish data to CloudWatch as single data points or as an aggregated set of data points called a statistic set using the command put-metric-data. It is recommended that when the user is having multiple data points per minute, he should aggregate the data so that it will minimize the number of calls to put-metric-data. In this case it will be single call to CloudWatch instead of 1000 calls if the data is aggregated.

NEW QUESTION: 3

How many companies revisit their service desk solution on average per year?

- A. 2/3
- B. 1/4
- C. 1/2
- D. 1/3

Answer: A

NEW QUESTION: 4

Good security is built on which of the following concept?

- A. The concept of a pass-through device that only allows

certain traffic in and out.

B. The concept of defensive controls.

C. The concept of defense in depth.

D. The concept of preventative controls.

Answer: C

Explanation:

Explanation/Reference:

Explanation:

Defense-in-depth is the coordinated use of multiple security controls in a layered approach. A multilayered defense system minimizes the probability of successful penetration and compromise because an attacker would have to get through several different types of protection mechanisms before she gained access to the critical assets.

Incorrect Answers:

A: Pass-through devices are not the central concept in building good security.

C: Preventative controls are not the central concept in building good security.

D: Defensive Controls is not the central concept in building good security.
