Serves as a leader in this industry, our company provides the best service and high-quality NS0-520 Dumps collection which can help our candidates pass the exam quickly.

Besides, you can control the occurring probability of the NS0-520 questions with high error rate.

NEW QUESTION: 1
Cisco Nexus 7000 Series switches
Reference:
http://www.cisco.com/c/en/us/td/docs/switches/datacenter/mds900
0/sw/5_2/configuration/g
uides/fund/DCNM-SAN-LAN_5_2/DCNM_Fundamentals/fund_overview.htm
l
A. 10-G Fibre Channel ports only use SFP+ interfaces.
B. The FCoE or Fibre Channel port allocations must be
contiguous on the 6200.
C. Direct FC connections are not supported to Cisco MDS
switches
D. vPC is not supported on the Ethernet ports.
Answer: B
Explanation:
When you configure the links between the Cisco UCS 2200 Series
FEX and a Cisco UCS
6200 series fabric interconnect in fabric port channel mode,
the available VIF namespace on the adapter varies depending on
where the FEX uplinks are connected to the fabric interconnect
ports.
Inside the 6248 fabric interconnect there are six sets of eight
contiguous ports, with each set of ports managed by a single
chip. When uplinks are connected such that all of the uplinks
from an FEX are connected to a set of ports managed by a single
chip, Cisco UCS
Manager maximizes the number of VIFs used in service profiles
deployed on the blades in the chassis. If uplink connections
from an IOM are distributed across ports managed by separate
chips, the VIF count is decreased.
